

THE SELF DRIVEN MODEL

STEP 1

A participant is found by Self Driven team members

STEP 2

The participant is told he/she will be given a monthly payment and that they have the choice of where they would like the funds to be directed to.

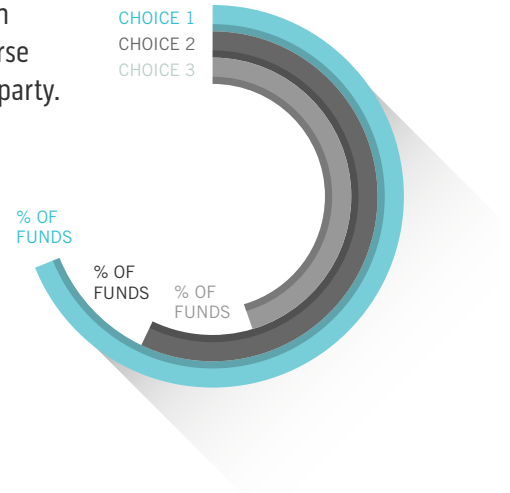

STEP 3

The participant determines the sum of the monthly payment, and where the funds are to be directed. This might be towards rental costs, food, child care, or debt repayment.

STEP 4

Self Driven team members disperse the funds third party.

STEP 5

The participant will not be monitored during this time, the only action required by them is to inform Self Driven when they no longer need the monthly payment.

STEP 6

EVALUATION
